

School Energy Conservation

You have recently been promoted to the energy commissioner of Garden City Public Schools. A government official visited your office and explained that your funding for energy will be cut by 25%. In order to cut costs you must find better ways to conserve energy. Your boss (the superintendent) has mandated that you send him a written proposal as to how you are going to conserve energy for the district in order to account for the decreased funding.

1st paragraph: background information, then thesis statement

2nd paragraph: first proposal

3rd paragraph: second proposal

4th paragraph: third proposal

5th paragraph: conclusion/summary
